CONTENTS OF VOLUME 130

BATT, J., P. H. MORRISON & G. REIN, Linear Stability of Stationary Solutions of the Vlasov-Poisson System in Three Dimensions 163

BRESSAN, A., The Unique Limit of the Glimm Scheme 205

CHEN, G.-Q. & P. T. KAN, Hyperbolic Conservation Laws with Umbilic Degeneracy, I 231

CHOI, Y. S. & R. LUI, Multi-Dimensional Electrochemistry Model 315

CHRISTODOULOU, D., Self-Gravitating Relativistic Fluids: A Two-Phase Model 343

ENGLER, H., Corrigendum to "Weak Solutions of a Class of Quasilinear Hyperbolic Integro-Differential Equations Describing Viscoelastic Materials" 401

HALLER, G. & S. WIGGINS, *N*-Pulse Homoclinic Orbits in Perturbations of Resonant Hamiltonian Systems 25

KAN, P. T., See CHEN, G.-Q. 231

LUI, R., see CHOI, Y. S. 315

LUNARDI, A., Stability in Fully Parabolic Equations 1

MORRISON, P. H., see BATT, J. 163

ORENGA, P., Un théorème d'existence de solutions d'un problème de shallow water 183

REIN, G., see BATT, J. 163

TANAKA, G., see TANI, A. 303

TANI, A. & N. TANAKA, Large-Time Existence of Surface Waves in Incompressible Viscous Fluids with or without Surface Tension 303

USAMI, H., Nonexistence of Positive Solutions and Oscillation Criteria for Second-Order Semilinear Elliptic Inequalities 277

WECKLER, J., On the Initial-Boundary-Value Problem for the Vlasov-Poisson System: Existence of Weak Solutions and Stability 145

WENNBERG, B., Stability and Exponential Convergence for the Boltzmann Equation 103

WIGGINS, S., see HALLER, G. 25
